OVERVIEW of HUMAN RIGHTS PROBLEMS IN GERMANY

1) PARENTS’ RIGHTS INFRINGED UPON BY THE PROHIBITION OF HOMESCHOOLING

Parents rights are commonly understood to include the right to choose the form of education of one’s children, including the possibility of non-institutional education, such as the so-called homeschooling.

Germany, however, allows homeschooling only in the most exceptional circumstances. In general, parents do not have the option to homeschool their children. Offenders have to pay fines, and occasionally, prison sentences are pronounced. The law dates back to the Nazi-Reichsschulgesetz in 1938 and is now specified in different state laws, with varying fines.

The UN special rapporteur on the right to education, Mr. Vernor Munez spoke in his 2006 report on Education in Germany of a „criminalization“ of homeschooling. No improvements have been made since.

2) PARENTS’ RIGHTS INFRINGED UPON BY COMPULSORY SEX EDUCATION

Germany’s states hold the competency for education laws. They all have a law on compulsory school attendance. There are no exemptions for sexual education lessons. These lessons are in practice mostly based on morally liberal ideas, advocating hardly any boundaries. Issues such as chastity, abstinence, natural fertility and the meaning of sexuality within the pursuit of happiness are normally not discussed. Such contents of sexual education creates difficulties for Christians parents. If they opt their children out of these classes – or only a particular lesson – they face fines. In countless proceedings, Christian parents were required to pay fines and faced prison sentences when they refused to pay.

3) FREEDOM OF CONSCIENCE CHALLENGED BY LAWS ON THE PROVISION OF MEDICATIONS

The German law requires pharmacists to provide prescribed medications within due time (§ 31 Abs. 1 Satz 1 and § 17 Abs. 4 SGB V). There is no exception for ethically ambiguous drugs, such as the early abortifacient morning-after-pill. If a pharmacy fails to deliver, its concession may be withdrawn (§§ 1 Abs. 2, 2 and 4 ApoG). Surgical abortion is subject to a conscientious objection clause, but early destruction of the embryo or prevention of nidation are not qualified as abortion in German law (§ 218 Abs. 1 Satz 2 StGB). A pharmacists’ initiative asked the German ministry for health to clarify the issue in 1986. The reply of the ministry stated that freedom of conscience (Artikel 4 Abs. 1 GG) was to be granted also to pharmacists and no fines would apply for the decline of the sale of early abortifacients, as long as they are not prescribed for therapeutical reasons. The answer of the ministry, however, is not legally binding. The uncertainty of whether the letter of the ministry dated 1986 would be followed by today’s courts constitutes a difficulty in the ethical considerations and the freedom of acting according to one’s conscience of pharmacists in Germany. It is therefore advisable to add a conscience clause for example to the German Apothekengesetz or the Sozialgesetzbuch V.
4) FREEDOM OF ASSEMBLY AND FREEDOM OF EXPRESSION VIOLATED IN SEVERAL GERMAN CITIES

Christian-inspired non-governmental organisations express their faith and their convictions by protesting in front of abortion clinics, or by simply standing in front of clinics or counselling centers in order to offer alternatives and conversation. In Freiburg and Munich, this activity has been severely limited. Local courts have given in to the pressure of the targeted locations, which could have been mainly financial ones. Courts have restricted the form of manifestation as well as established a geographical ban. Appeals are ongoing.

4) HATE INCIDENTS AND INFRINGEMENTS ON FREEDOM OF ASSEMBLY

As portrayed in the cases selection in the Annex (2), anti-religion groups have created a climate hostile to frank discourse. Besides defamation campaigns and negative stereotyping, hate incidents such as the blocking of university facilities for professors or speakers with deviating views, as well as manifestations against peaceful events are recorded by the Observatory. Anti-religion slogans and images are often used in hurtful manners, such as the public destruction of crosses, the image of Jesus as a crucified pig, or slogans such as “We are here to hurt your feelings” or “If Mary had had an abortion, we would have been spared people like you”. Such physically or verbally violent attacks are only employed by anti-religious groups and violate freedom of religion as well as social cohesion.

5) VANDALISM AGAINST CHRISTIAN PLACES OF WORSHIP

As portrayed in the cases selection in the Annex (3), in Germany there is a particularly strong prevalence of vandalism against Churches, Church affiliated buildings and Christian cemeteries.
