**HIGH COMMISSIONER FOR HUMAN RIGHT'S OFFICE**  
**COUNCIL OF HUMAN RIGHTS**

As is known, Cuban revolution from its beginning was exposed to many political, cultural, diplomatic, military, psychological, ideological and especially economic attacks. However, those attacks have never reached the extent of the offense conducted by US today.

In the recent times, US directly or indirectly finances counter-revolutionaries who disguised under the identities of 'defenders of human rights' or 'pacifists' but actually who work as missionaries of US. It is observed in the printed and visual press that US has increased its subversive attempts against Cuban regime. In those attempts, the concepts of factitious discourses of bourgeois democracy such as 'multi party system' and 'representation' are put into service. Yet, in Cuba, democracy does not designate an abstract and formal notion. The existing election and representation patterns practiced in Cuba are the indicators of a real people's democracy which is open to development and deepening and much more advanced than bourgeois democracies.

We believe wholeheartedly that Cuban people will resist against the attacks in question with all the legitimate means and maintain the belief and tenacity in keeping up 'Socialism'.

We reiterate that we take side of Cuban people and Cuban state against the attacks mentioned above. We appeal to the international community to defy against or at least not to support the extensive offense started by US.

Best Regards
